

# Ephraim Green Newsletter

*Celebrating our historical village and our healthy living*

## **Green Tier Healthy Living Updates:**

### ***Streetscape***

Among all of the big changes, the completion of the project brings safer day-time and night-time walking, better storm water management, and safer roads. Our sleek, updated 67 street lights with LED bulbs were the environmentally responsible choice, reducing our energy use, improving our night-time “dark sky” credentials, and reducing our village energy bill. Energy conservation and cost savings go hand-in-hand.

### ***Bike Racks***

To keep making it easier to avoid short drives and reduce parking issues, we installed a new 3rd bike rack at the Village beach, in addition to the other two installed at the Village Hall and the marina.

## **Recycle and Re-use Actions**

The Village of Ephraim offers free municipal services to Ephraim residents at our recycling center at 10361 Town Line Dr:

- (1) **recycling** drop-off
- (2) **lawn waste** drop-off
- (3) **mulch** pick-up

Use these services to reduce the amount of trash you send to the landfill and reduce your disposal bills!

**Share the Love!...** What are you doing at your home or business to be more green? Please let us know!

*Ephraim is proud to be a Green Tier community, committed to take simple, voluntary, cost-effective actions to maintain and keep improving upon our clean water, our environmentally-friendly practices and our healthy lifestyles*
